

## **ASX Announcement**

**30 November 2005**

### **COMMENCEMENT OF MARINE SEISMIC SURVEYS IN CARNARVON BASIN, WESTERN AUSTRALIA**

Bow Energy Limited has been advised by Strike Oil, the operator of TP/19, EP 421 and EP 325, that the acquisition of the Karratha South seismic survey in TP/19 and EP 421 (Bow Energy 10%) and the Rivoli 2D in EP 325 (Bow 11.1%) are scheduled to be completed during the month of December 2005 using the marine seismic acquisition vessel Pacific Sword.

The surveys will be conducted over known prospects and leads with the view to maturing a number of locations primarily for oil exploration drilling in the latter half of 2006. All the prospects and leads are in water depths of less than 50 metres and can be drilled by a jack-up rig.

Additionally, the Rivoli survey in EP 325, will be over the Rivoli gas field located 7 km south east of Exmouth. This field is currently estimated to contain about 15 billion cubic feet of recoverable gas with untested potential in the underlying Rivoli Deep prospect. The new seismic data should provide additional information required to make a more accurate assessment of the field and the potential of the deeper prospect.

For and on behalf of the Board  
Duncan Cornish  
Company Secretary
