

ASX Announcement

25 January 2007

Bow to recommence operations when roads are passable

The Directors of Bow Energy Limited (Bow) advise that the temporary evacuation of the Marracoonda-2 well site has been completed. A skeleton crew has been left on site to monitor the well.

The Marracoonda-2 location is on local high ground and although not directly affected by the rains, sections of roads to the well are flooded. Bow will commence ongoing operations at Marracoonda-2 as soon as weather and access allow.

Following the three wells in the Wompi Block, the next two wells planned in ATP 752P are in the Barta Block. The Barta Block wells and final drilling locations are conditional on the results of recent 2D and 3D seismic programs in the Block. A preliminary interpretation of the new and reprocessed 2D seismic data indicates several commercial size oil prospects are present in the Block.

Bow is fully carried on the Cooper-Eromanga ATP 752P oil exploration drilling program to casing point or P&A and retains 25% direct working interest after the farmin program by Avery Resources (Australia) is completed.

The interests in Marracoonda-2 and ATP 752P (following the completion of the Avery Resources (Australia) Farmin) are:

Bow Energy	25% (Operator)
Victoria Petroleum	25%
Avery Resources	50%

For and on behalf of the Board
Duncan Cornish
Company Secretary
