

## ASX Announcement

1 August 2008

### Operations Update

The directors of Bow Energy Limited (Bow) are pleased to offer the following update on field operations.

#### **Don Juan CSG Joint Venture – Caranarvon-4 Reaches Total Depth**

The Carnarvon-4 core hole reached a total depth of 376m on 31 July 2008. A total of 13 core samples were taken for gas content estimates and other analysis with 10m of net coal intersected. Drilling operations were temporary suspended for 6 days due to wet weather in the area and recommenced on 30 July 2008.

The rig is moving to start drilling at the Carnarvon-2 location over the weekend.

The core hole drilling exploration program is designed to determine coal thickness and gas contents of coals in the area drilled which are important components required for the Don Juan Joint Venture reserves certification process.

For and on behalf of the Board  
Duncan Cornish  
Company Secretary
